

Reference Object “Béthune 49 in Béthune/France”

External thermal insulation composite system (ETICS) and basement ceiling insulation with insulation materials made of Neopor®

- Béthune 49 project of the social housing company HABITAT 62/59 PICARDIE: construction project for social rented flats
- Reproducible, modern pilot project: first construction project of this kind in France
- Performance of energy savings that is still rare at this time through:
 - Combined innovative solutions to prevent thermal bridges
 - ETICS and basement ceiling insulation with Insulation boards made of Neopor®
- Intention of the builders:
 - Optimal solutions from a cost-benefit perspective
 - Compatibility of social housing construction and excellent energy efficiency
